Clover Collection Stool

Highly refined, uniquely faceted

Clover Collection
Stool
Designed by 5d Studio

The Clover Collection Stool is light in scale, yet speaks of quality in its upholstery and stainless steel base. It shares with the rest of the collection the faceted seat, flowing from the front edge into the contours of the back. And as part of a collection, Clover pieces can carry a thread of design continuity throughout a space that contains different functional environments.

A refined base of stainless steel keeps the profile of the Clover stool light, yet balanced

The upholstery's faceted front edge flows into the contour of the stool's back

Specifications

A seat of multi-density polyurethane foam is affixed to a stainless steel base, which comes standard with a non-return swivel.
