Fresh forms for flexibility

Slide Collection
Port Lounge Chair
 Designed by David MocarSKI

The variations of the Port Lounge Chair respond to differing needs for flexibility and mobility. All of them offer the same "embrace," as designer David MocarSKI describes it, with a seat design that can accommodate many different postures and a back that wraps the user with support. Choosing between four legs or an airy swivel base can telegraph a mobile or more stationary piece: The four-leg version is easily moved, while the swivel with its self-return is designed to be more static.

The solid stainless steel swivel base is visually airy and physically durable

High- and low-back options increase flexibility in application

The simplicity of the upholstery allows the fabric or leather to make its own statement

Specifications

The Port Lounge Chair has an upholstered seat and back cushion with a rigid polyurethane core. The lounge is available with a self-return swivel base for those who prefer stationary seating or a 4-leg base for those who prefer to move the lounge around.

Options:

Upholstery: COM/COL, Fabric, and Elmo Leather Program
 Base: Polished or Satin Stainless Steel; Statuary Bronze also available
 Glides: Felt pads are an additional option for the standard nylon glides
